

Welcome to OZeCommunity

If you've read anything at all about Content Management Systems (CMS), you'll probably know at least three things: CMS are the most exciting way to do business, CMS can be really, I mean really, complicated and lastly Portals are absolutely, outrageously, often unaffordably expensive.

Joomla! is set to change all that ... Joomla! is different from the normal models for portal software. For a start, it's not complicated. Joomla! has been developed for the masses. It's licensed under the most popular 'open-source', easy to install and administer and reliable. Joomla! doesn't even require the user or administrator of the system to know HTML (geek-speak) to operate it once it's up and running.

However, to get things really running smoothly, you need the skills & experience of OZeCommunity. Our extensive knowledge of the various applications, combined with our experience as end users, and within the business, government and NGO sectors makes us the perfect 'translator' between what you want and how software functions.

Joomla! features: News, products or services sections fully editable and manageable

- Topics sections can be added to by contributing authors
- Fully customisable layouts including left, center and right menu boxes
- Browser upload of images to your own library for use anywhere in the site
- Change order of objects including news, FAQs, articles etc.
- Random Newsflash generator
- Remote author submission module for News, Articles, FAQs and Links
- As many sections, departments, divisions and pages as you want
- Image library - store all online for easy use
- Automatic Path-Finder. Place a picture and let Joomla! fix the link
- News feed manager. Choose from over 360 news feeds from around the world
- Archive manager. Put your old articles into cold storage rather than throw them out
- Email-a-friend and Print-format for every story and article
- In-line Text editor similar to Word Pad
- User editable look and feel
- Polls/Surveys - Now put a different one on each page
- Template Manager. Download templates and implement them in seconds
- Layout preview. See how it looks before going live
